

Assignment - Operators

1.

Write a small program to ask user for 2 strings. Print `True` if 1st string is in 2nd string, otherwise print `False`.

Sample output:

```
Enter 1st String: hello
Enter 2nd String: hello world
True
```

2.

Write a small program to ask user for an integer. Print `True` if it cannot be divided by either 2 or 3, otherwise print `False`.

Sample output:

```
Enter an integer: 10
False
Enter an integer: 13
True
```
